RE: Route 561 Dump Site, Gibbsboro, New Jersey Feasibility Study
The Sherwin-Williams / Hilliards Creek Site, Gibbsboro, New Jersey
Administrative Order Index No. II CERCLA-02-99-2035 (1999)

Dear Ms. Gelblat,

In fulfillment of Section VII, paragraph 27.f.1. of the above-referenced Administrative Order on Consent (AOC), The Sherwin-Williams Company (Sherwin-Williams) is submitting the revised Feasibility Study (FS) for the Route 561 Dump Site located in Gibbsboro, New Jersey. This FS has been revised since its original submission on December 18, 2015 to incorporate changes requested by EPA in its comments to the draft FS, as well as the latest April 27, 2016 teleconference with EPA.

This FS evaluates remedial alternatives for soil, sediment, and surface water against the criteria established in the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). As directed by EPA, remedial alternatives for groundwater are not evaluated.

If you have any questions or need further information, please do not hesitate to contact me at (216) 515-7544 or via email at ken.h.stroebe@sherwin.com.

Sincerely,

Kenneth H. Stroebe
Sr. Project Manager
Corporate Remediation Services
